!D Cloud RFID in the cloud

RFID technology makes it possible to automate your in-store stock management – resulting in optimal merchandise availability for your customers and an in store stock accuracy of over 98%. Incorrect shipments, administrative errors and faulty ERP data that lead to unneeded out-of-stock situations are finally a thing of the past.

Product availability is key

Making sure that a product is available for your customers is crucial these days - no matter if they visit your store or your webshop. However, merchandise availability should not result in overstocked stores and the associated high capital cost. That is why accurate stock information at all times is key.

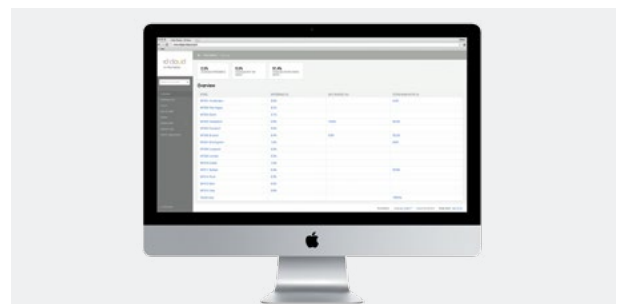

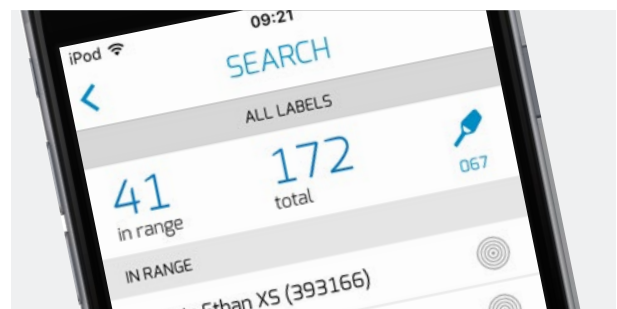

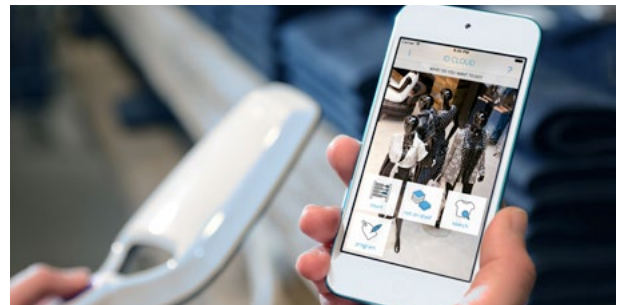

Accurate stock data requires RFID

Taking inventory fast, often and accurately enables you to gain an understanding of your actual stock. Thereby, any empty shelves can be replenished and any causes of stock differences, through losses or administrative errors, can be identified and dealt with more quickly.

RFID in the Cloud

!D Cloud is a Software as a Service (SaaS) solution, which makes it easy to start fast and benefit immediately. There is no need to modify or replace your ERP system and there is a minimal need to involve your IT department.

!D Cloud translates the collected data from handheld and fixed RFID readers in the stores into comprehensive lists that highlight the out-of-stocks and overstocks. These detailed insights into actual stock levels enable retailers to improve the speed and quality of the in-store and DC-to-store replenishment, increase sales and offer omnichannel services.

About Nedap

Nedap offers practical solutions to typical challenges retailers face worldwide. Our mission is to make it simple for retailers to always have the right products available.

To achieve this, we offer industry-leading solutions for our customers' diverse needs in loss prevention and stock management.

We are committed to increasing your revenue by helping you to permanently reduce shrinkage in your stores and counting your inventory more often in order to optimize your merchandise availability.

Global Presence

Nedap solutions are built upon 40 years of global experience, market expertise and close cooperation with leading retailers.

Our worldwide operations are supported by a flexible network of certified partners across the globe. Our partners represent us and support our global clients in every relevant retail market in the world.

Nedap Retail has offices in the Netherlands, France, Germany, UK, Spain, US, China and Hong Kong and certified partners in more than 120 additional countries.
